EDUCATION

University of Massachusetts Amherst

Amherst

Manning College of Information and Computer Sciences, College of Natural Sciences, Honors Student

Bachelor of Science in Computer Science and Bachelor of Sciences in Chemistry

May 2028

- Cumulative GPA: 3.959, Dean's List (Fall 2024, Spring 2025, Fall 2025, Spring 2026)
- Chancellor's Award Recipient
- Pursuing Honors Thesis focused on the intersection of Computational Modeling, data science, and artificial intelligence, and algorithmic approaches in molecular research.

ICons Program (Integrated Concentration in STEM)

ICons Scholar - AI & the Future of Work Track

- Participated in 20 - credit interdisciplinary training focused on solving real-world challenges involving AI, technology'
- Collaborated with students across STEM, business, and policy to develop research-driven solutions.

Relevant Coursework:

- Artificial Intelligence, Pract & Appl of Data Management, Programming Methodology, Instrumental Analysis, Object Oriented Programming, Introduction to Python, Data Structures, Reasoning under Uncertainty, Calculus I, Calculus II, Multiderivative Calculus, Linear Algebra, Advanced Organic Chemistry, Quantitative Analysis

WORK EXPERIENCE

University of Massachusetts, Amherst

Amherst, MA

Breakthrough Tech AI – Cornell University

AI Program Fellow | ML Foundations + AI Studio

May 2026 - May 2027

Competitive a year fellowship developing industry-ready ML and AI engineering skills through Cornell's Breakthrough Tech AI initiative.

- Completing Cornell-certified Machine Learning Foundations curriculum (12–15 hrs/week) covering data pipelines, ML model training, and validation using Python and industry-standard AI/ML tools and libraries
- Building and presenting a professional AI/ML portfolio through team-based industry challenge projects (AI Studio) hosted by leading tech companies in Fall 2026 and Spring 2027
- Receiving 1:1 industry mentorship, career coaching, and internship placement support from senior ML engineers and data scientists
- Earned Cornell University Certificate in Machine Learning upon completion of summer ML Foundations course
- Selected from a nationally competitive applicant pool; program targets high-potential CS students pursuing careers in data science, AI, and machine learning

Riccio College of Engineering - Soil and Watershed Hydrology Research, Professor Christian D. Guzman

Research Assistant

Aug 2025 - Dec 2025

- Analyzed 1,000+ environmental sensor records (temperature, moisture, watershed metrics)
- Performed data cleaning, preprocessing, and quality control workflows
- Organized and analyzed large datasets, improving workflow efficiency

Peer Mentor at Umass Residential Life

July 2025 - Present

- Mentored 15–20 first-year students in a residential setting, providing academic, personal, and logistical support
- Resolved student concerns and conflicts using strong communication and problem-solving skills
- Served as a reliable point of contact, ensuring a safe, welcoming, and organized residential environment

CodePath - Applied AI Engineering Pathway

AI Engineering Fellow (Applied AI Engineering)

Feb 2026 – Apr 2026

- Built AI-powered software systems integrating LLM-based APIs
- Practiced AI-assisted development, debugging, and system design

SOFTWARE & DATA PROJECTS

University of Massachusetts, Amherst

Amherst, MA

Scott M. Auerbach, PhD - Provost Professor of Chemistry & Chemical Engineering

Jan 2026 - Present

Undergraduate Research Assistant (Machine Learning & Graph Analysis)

- Modeled 10,000+ atom molecular simulations as graph networks for ML pipelines
- Engineered feature extraction pipeline using structured data transformations
- Maintained organized records and managed large datasets with high attention to detail
- Demonstrated accuracy and consistency in handling complex information

Digital Empathy Coach - HackUMass XII (Team Developer)

Nov 2025 - Nov 2025

- Developed AI-powered prototype in a 36-hour agile development sprint
- Contributed 10+ Git commits in a collaborative 4-engineer team environment

TECHNICAL SKILLS

Programming & Analysis: Python, Java, MATLAB; basic SQL

Data Management: Data entry, cleaning, validation (Excel, Python)

Statistical Skills: Statistical modeling, quantitative analysis

Research Practices: Scientific documentation, quality control, reproducible workflows

Tools: Git, GitHub, Claude, Excel

LEADERSHIP AND INVOLVEMENT

University of Massachusetts, Amherst

Amherst, MA

CICSoft (Computer Science Club) - Member

Aug 2025 - Present

- Collaborated with 4–6 developers on GitHub-based software projects, contributing features through 5+ pull requests
